## Work Experience

### Deel

remote

SOFTWARE ENGINEER

2024 – 2026

- Headed development of in-platform document preview for uploaded files, enabling customers to track status, check signatures, view submission dates, zip files, and preview documents without external downloads; cut document handling time by 30% and increased satisfaction scores from 60% to 90%
- Drove implementation of bulk upload document-processing tools, significantly reducing wait times and rejection rates while establishing new efficiency benchmarks
- Took ownership of the mobile app compliance documents page; accelerated contractor and employee onboarding to 98% completion
- Adopted integration of Non-Disclosure Agreements into team's framework, simplifying document creation and management for 4,000+ client organizations
- Engineered a self-service feature for workers to request signed documents, shortening the process and reducing administrative overhead by an estimated 30%
- Designed and implemented an automated reminder email system for registration documents during PEO client onboarding, minimizing delays and ensuring compliance
- Enhanced AI Automated Workforce no code feature so clients could integrate documents into custom workflows, lifting customer satisfaction from 50% to 90%

### First American

remote

SENIOR SOFTWARE ENGINEER

2022 – 2024

- Proposed and delivered a user-centric design initiative with iterative UI improvements, yielding a 25% increase in conversion rates
- Orchestrated development of ClarityFirst, an end-to-end digital solution for commercial real estate transactions
- Implemented a settlement statement sharing feature that cut onboarding from 2 weeks to 9 days, enhancing engagement and shortening the process
- Piloted a quality assurance initiative that raised unit test coverage from 40% to 85% and achieved a 30% reduction in post-release bugs

### Sportradar

Kyiv, Ukraine

SENIOR SOFTWARE ENGINEER

2021 – 2022

- Developed a full-stack basketball team roster tracking app used by betting operators, simplifying team management and improving data accuracy

### Globalcitizen

Kyiv, Ukraine

SENIOR SOFTWARE ENGINEER

2020 – 2021

- Built an interactive globe featured on the site homepage, reaching 690,000 monthly visitors

### Abu Dhabi Investment Authority

Abu Dhabi, UAE

FULL STACK ENGINEER

2019 – 2020

- Implemented an automated compliance tracker that reduced trade approval time from days to minutes for fund managers

### Rubicon Project

Kyiv, Ukraine

FRONTEND ENGINEER

2018 – 2019

- Ensured full compliance with web accessibility standards (ADA), expanding the user base and reducing compliance risk

## Education

Kharkiv National University of Radio Electronics

Kharkiv, Ukraine

MASTER OF ENGINEERING
